

Introducing the new
**BlackBerry Wireless
Headset HS-700**

Your voice in command.

BlackBerry

Just say the word.

Introducing the new BlackBerry® Wireless Headset HS-700: the headset that puts your voice in command. Designed to work with your BlackBerry® smartphone, it lets you answer your calls by saying "answer" or "ignore". You'll know who's calling - the headset uses your Contacts list to announce your caller's name. And if you want to make a call, switch between two conversations or mute, just use voice commands to tell your smartphone what you want to do.

When you're on the road, BlackBerry Wireless Headset HS-700 helps you steer the conversation along naturally.

The automatic volume control adjusts the level, so you don't have to reach for your smartphone. There's no need to raise your voice, because the noise-cancellation reduces background noise wherever you are. Once a call is over, you can listen to your audio files and get GPS mapping with turn-by-turn directions. And get the ultimate hands-free calling experience with a sleek headset that's designed for your voice.

Turn talk into action

The perfect set-up

Pairing your BlackBerry Wireless Headset HS-700 with your BlackBerry smartphone is simple: once you turn it on, it talks you through the set-up. So you can start talking right away.

Prompt response

Voice prompts announce the name of incoming callers, alert you with battery status updates, mute status and much more – letting you stay in control of your conversations.

Command performance

Your wish is its command. Click the voice command button to ask a question or to instruct it using the sound of your voice. To answer a call, just say “answer” or “ignore.” Then dial, mute, swap calls, redial and more without reaching for your smartphone.

Made for each other

When you pair the BlackBerry Headset HS-700 with your BlackBerry smartphone, you’ll know they were made for each other. Now you can hear the names of the incoming callers, not just their phone numbers¹. Or listen to the audio files on your smartphone. And if you’re using a third-party GPS app, get turn-by-turn directions announced from your headset.²

Keep it on the level

Whether you’re on the highway or in a crowd, don’t let outside noise interfere with your call. The advanced noise-cancellation technology in the BlackBerry Headset HS-700 reduces background noise, making your conversations feel and sound more natural. And the automatic volume control adjusts the volume of your call in noisy environments, so you can keep talking normally.

Stay in your comfort zone

With a sleek, stylish design, the BlackBerry Wireless Headset HS-700 is easy to wear and easy on the eyes. It comes with carefully crafted ear gels and ear hooks to fit you right, so you get fit, comfort and style everything in a fully loaded headset.
